DATA IS ESSENTIAL FOR BUILDING AI, BUT …

🔒 Data is Locked

Organizations Lock Valuable Data
Fear of breaches and regulatory penalties forces organizations to lock data away.

Regulations are Tightening Data Usage
Saudi Personal Data Protection Law (fully enforced 2024), GDPR (EU), HIPAA (US).

The Data Sharing Dead-End
Healthcare systems, banks, and government agencies cannot legally share sensitive data with each other even internally across departments.

📉 Data is Insufficient

The Data Wall
High-quality data will be fully consumed between 2026–2032.

The Rare-Case Gap
Datasets are heavily biased toward common scenarios, while rare and edge cases remain underrepresented.

💸 Data is Expensive

The Cost Barrier
Real-world data acquisition is expensive, slow, and inherently unscalable.

NO SOVEREIGN **SYNTHETIC DATA** LAYER IN SAUDI ARABIA

GAP 01 · LANGUAGE & CULTURE

Existing platforms are largely English-centric and do not adequately support Arabic language, local context, or cultural nuances. Critical use cases in e-government, healthcare, and media AI remain underserved.

GAP 02 · SECTOR DEPTH

Saudi industries require domain-specific training data that reflects real local conditions such as healthcare records, traffic patterns, and energy systems. Current solutions lack this level of sectoral realism and specialization.

GAP 03 · DATA SOVEREIGNTY

No domestic synthetic data infrastructure exists to serve this demand. Existing platforms rely on cloud-based infrastructure, requiring data to be processed outside the Kingdom. This creates regulatory risk and limits adoption in sensitive sectors.

WHY THIS MATTERS?

Saudi Arabia aims to

Contribute **$135B** to GDP from AI by 2030, equivalent to ~12.4%.
(PwC Middle East)

Attract **$20B** in AI investments
(SDAIA)

Rank among the **Top 15** countries in AI globally
(SDAIA)

None of these targets are achievable **without compliant, accessible data**

WELL7. AI: SOVEREIGN DATA PLATFORM BUILT FOR KSA

PDPL Compliance

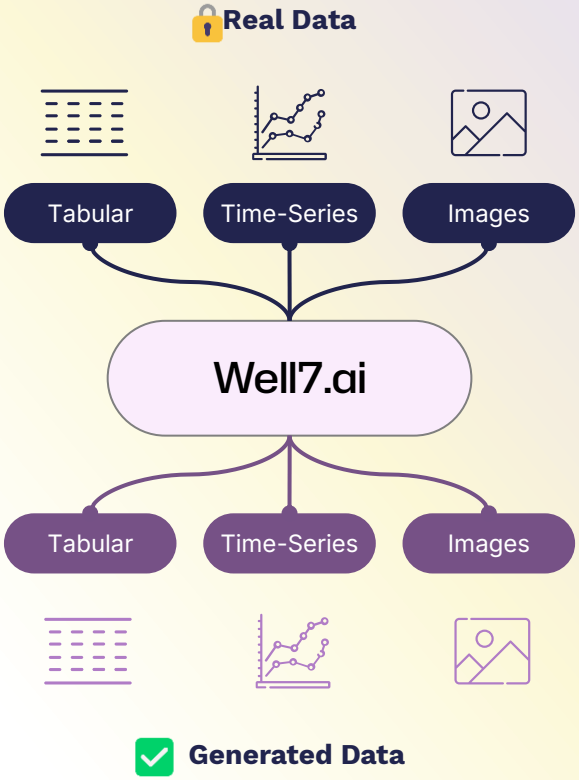
Architected with privacy-by-design to adhere strictly to the Saudi PDPL standards, facilitating absolute anonymization.

On-Prem Deployment

The full suite operates offline within securely containerized ecosystems utilizing proprietary algorithmic engines.

Data Governance

Strict tracking measures limit direct access to raw information while fostering high-fidelity synthetic representations.



REVENUE SOURCES :

Private Deployment Packages

This includes the on-premise and air-gapped deployments, enabling organizations to operate entirely within secure, isolated environments while maintaining full compliance with local regulations.

Data-as-a-Service (DaaS)

The platform provides pre-generated, sector-specific synthetic datasets tailored to Saudi use cases such as healthcare, finance, and smart cities.

Professional Services & Custom Solutions

Delivering synthetic data pipelines and advisory services tailored to client needs. This includes building domain-specific datasets, and integrating with internal systems.

MARKET POTENTIAL

$3.7B

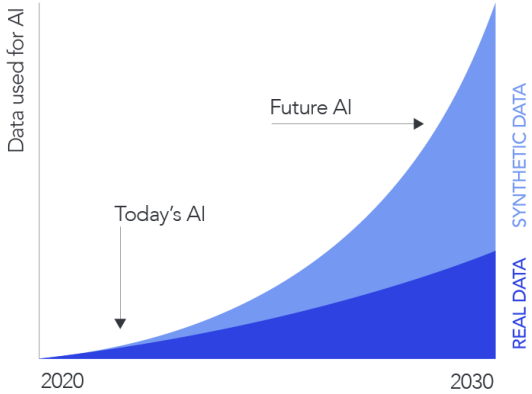
Global Synthetic data market by 2030 (41.8% CAGR)

$14.9M

Saudi Synthetic data market by 2030 (41.8% CAGR)

60%

of all AI training data will be synthetic by 2026



TARGET CUSTOMERS

Healthcare Providers

AI diagnostic models require synthetic patient data to avoid PDPL violations.

Banks & Fintechs

Fraud detection and credit scoring AI requires synthetic financial transaction data.

Government Entities

Digital Government Authority AI automation of Absher, Etimad, Nafath, requires synthetic citizen interaction data.

Energy (Aramco, ACWA)

For training predictive maintenance AI for oil, gas, and renewables without exposing critical infrastructure data.

Telecom companies

STC, Mobily, Zain need synthetic network performance and customer behaviour datasets at scale.

AI Startups

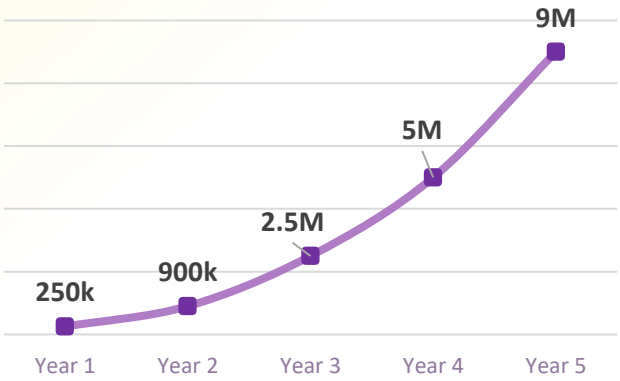
Providing the data infrastructure layer for the entire startup ecosystem.

Research institutions

Universities need diverse training datasets to develop 20,000+ AI specialists by 2030.

ROI

Projected Revenue (SAR)



Strategic Outlook

Year 1–2
Pilot projects
Government partnerships
Initial revenue: SAR 250k–900k

Year 3–4
Expansion across sectors
SaaS scaling
Revenue: SAR 2.5–5.0M

Year 5
National platform positioning
Regional expansion
Revenue: SAR 9.0M+

DEEP EXPERTISE ACROSS **AI**, **DATA GOVERNANCE** & **SAUDI TECH**

SB

Saeed Bashmal

CEO & Founder

Business strategy, partnerships, and Saudi market execution

LB

Dr. Laila Bashmal

Co-Founder & Chief AI Scientist

AI research, synthetic data architecture, and scientific validation

SM

Saad Almuammar

Strategic Operations Lead

Company setup, operational readiness, and local execution support

AM

Ahmed Almusawa

Founding AI Engineer

Model implementation and early-stage AI system development

Advisory Board

Former SDAIA senior advisors · KAUST AI Centre faculty · Legal counsel specialising in PDPL and Saudi data law · Healthcare AI experts from the Ministry of Health · Fintech compliance specialists from SAMA-regulated institutions

WHAT WE ARE SEEKING FROM THE **SAUDI ECOSYSTEM**

Strategic

Partnerships & Ecosystem Access

→ Introductions to SDAIA, DGA, and CST for pilot program designation.

→ Access to HUMAIN's AI infrastructure for Well7's generation workloads

→ MONSHA'AT / BADIR accelerator cohort inclusion

→ Government procurement fast-track through established partner relationships

→ Saudi Venture Capital (SVC) co-investment introduction

Regulatory

Policy & Regulatory Support

→ NDMO sandbox participation for synthetic data certification framework

→ SDAIA designation as a PDPL-compliant data service provider

→ Input into CST's Global AI Hub Law to include synthetic data as a regulated service

→ MOH and SAMA pilot programs for healthcare and fintech synthetic data

Well7.ai

Well7.ai is the missing infrastructure layer in Saudi Arabia's AI stack.

BUSINESS MODEL CANVAS

KEY PARTNERSHIPS

· SDAIA
· HUMAIN / PIF
· CST
· Universities
· Saudi data centres
· SAMA / MOH pilots
· System integrators

KEY ACTIVITIES

· Synthetic data gen. R&D
· Arabic NLP development
· PDPL compliance engineering
· Government pilot delivery

KEY RESOURCES

· Proprietary gen. AI models
· Arabic NLP corpus
· Sovereign cloud infra.
· Regulatory relationships

VALUE PROPOSITION

· Only sovereign, PDPL-compliant platform in KSA
· Arabic-first NLP & multi-modal data generation
· Removes legal & privacy barriers
to AI development
· Statistically validated, auditable synthetic datasets
· Compliance Certificate regulatory proof of privacy

CUSTOMER RELATIONSHIPS

· Dedicated gov. account teams
· Developer self-serve portal
· SDAIA ecosystem events

CHANNELS

· Direct government sales
· System integrator partners
· Developer API portal
· GAIN Summit presence

CUSTOMER SEGMENTS

· Government (MOH, DGA)
· Banks & Fintechs (SAMA)
· Giga-Projects (NEOM)
· Healthcare providers
· Telcos (STC, Mobily)
· AI Startups
· Energy (Aramco, ACWA)

COST STRUCTURE

· Engineering & R&D team salaries (~40% of total costs)
· Sovereign cloud infrastructure (compute & storage)
· PDPL compliance & legal counsel
· Sales, BD, and marketing
· G&A Riyadh HQ
· Regulatory engagement & certification

REVENUE STREAMS

· SaaS subscriptions (government & enterprise annual licenses)
· Data-as-a-Service marketplace (dataset sales)
· Professional services (custom data pipeline projects)
· API usage-based billing (developer tier)
· Compliance Certification fees
· Training & workshops (PDPL compliance education)

DATA SOURCES & REFERENCES

Global Market Data:

1. Research and Markets (2025): Global Synthetic Data Generation Market → $3.7B by 2030, CAGR 41.8%
2. Grand View Research (2025): AI Training Dataset Market → $16.3B by 2033, CAGR 22.6%
3. MarketsandMarkets (2024): AI Training Dataset Market → $9.58B by 2029, CAGR 27.7%
4. Gartner: 60% of AI training data will be synthetic by 2026

Data Scarcity:

1. Epoch AI (2024): High-quality internet data to be exhausted 2026–2032 (~300 trillion tokens)
2. Data Provenance Initiative — MIT/Harvard (2024): 45% of highest-quality sources restricted in 2023–2024
3. Elon Musk (Feb 2025): 'We've now exhausted basically the cumulative sum of human knowledge in AI training'
4. World Economic Forum (Dec 2025): 'The vast well of data that fuelled the last wave of AI breakthroughs is running dry'

Saudi Arabia AI & Vision 2030 :

1. PwC Middle East: AI to contribute $135.2B to Saudi GDP by 2030 (12.4% of GDP)
2. SDAIA / NSDAI (2020): Top 15 AI globally; 20,000 specialists; 300 startups; SAR 75B investment target
3. Tortoise Global AI Index (2024): KSA ranked 14th globally (up from 31st in 2023); #1 Government Strategy
4. Tortoise Global AI Index (May 2025): KSA ranked 22nd globally; 1st Arab world; 2nd Government Strategy
5. Access Partnership (2020): 66 of 66 Vision 2030 objectives rely on data and AI
6. Saudi Market Research Consulting (2025): HUMAIN targets 7% of global AI model training by 2030; 500MW compute

Saudi Regulatory & Policy :

1. SDAIA / Royal Decree M/19: PDPL fully enforceable 14 September 2024
2. IAPP (Sept 2025): PDPL First Anniversary — enforcement maturing, progressive penalties signalled
3. CST (April 2025): Draft Global AI Hub Law — public consultation; positions KSA as global AI hub
4. Techrxiv (2025): 86% of public sector organisations lack adequate cloud data governance
5. MCIT ICT Strategy 2023: 25,000+ jobs; IT market growth 50%; GDP contribution +$13.3B
